## Base Layer

The first part of any active layering system starts next to the skin, which is why our base layers are often referred to as a second skin.

The Warmtex® technology of our base layer garments traps a thin layer of warm air against the body and pulls sweat away from the skin. This process is known as 'wicking' and enables the base layer to keep you warm when it's cold and cool when it's warm.

Whilst used primarily for sports and team wear, Warmtex® garments also make a perfect base layer for workwear, providing unrivalled comfort and performance.

#### **TECHNICAL INFORMATION**

Ever wanted to know how to measure yourself correctly or what exactly is the best way to remove red wine from your favourite shirt? You'll find the answers to these questions and quite a few others right here...

Caring for your Kustom Kit garment - all you need to know (and perhaps a little bit more!) on how to preserve the look, feel, fit and wear of your Kustom Kit garment.

#### **GARMENT FIBRE PROPERTIES**

Cotton: Absorbent, strong, washes well with care.

**Lycra® & Elastane:** High stretch recovery with good shape retention.

**Polyester:** Durable, easy care, good shape retention.

#### WASHIN

Always look for the garment care label and follow the washing instructions. Washing machines, powders and fabrics are specially manufactured to ensure that when washed at the right temperature your clothes will come out looking their best time after time.

The washtub symbol tells you the washing process to be used.

60° Washing Symbol Spin Cotton Cycle

₩ 60° Washing Symbol Spin Synthetic Cycle

40° Washing Symbol Spin Cotton Cycle

40° Washing Symbol Spin Synthetic Cycle

- Before washing, close all zips, undo buttons and flatten out collars and cuffs. Check pockets and linings for loose or sharp objects.
- Turn garments inside out to reduce abrasion so avoiding contamination by fibres from other garments during the wash cycle.
- Always read the label for correct washing temperature.
- Do not overload the washing machine.
- Always use the correct amount of detergent depending on how dirty the garments are.
- Check garments regularly for marks or stains and remove as soon as possible. See our Stain Removal guide.

#### **DRYING**

Always check the care label to see if a garment can be tumble dried. When tumble drying the following is recommended:

Garment Type	Drying Time
Cotton	50-100 minutes
Cotton Polyester	35-55 minutes
Heavy Synthetics	45-65 minutes
Light Synthetics	30-40 minutes

In cases where tumble drying is not appropriate, there will often be alternative drying methods suggested such as dry flat or drip dry.

Dry flat - Re-shape whilst damp

III Drip dry

- Re-shape whilst damp, by gathering the hem in one hand, holding the shoulders in the other and pulling back into shape.
- When line drying shirts or jackets, always hang from the tail.
- When line drying knitted garments, always fold over the line and position pegs at the under arm.
- When line drying trousers or skirts, always hang from the waist.
- Do not leave clothes exposed to the sun after they have dried.
- Avoid drying garments on radiators or intense heat as this could distort the shape.

#### IRONING

The iron symbols advise the optimum temperature at which to iron. The dots represent the recommended iron temperature - the more dots the better the iron

- Iron symbol with one dot up to 110° (Cool)
- Iron symbol with two dots up to 150° (Warm)
- Iron symbol with three dots up to 200° (Hot)
- 🔀 Do Not Iron symbol Do not Iron. Steam treatment not recommended.

- Iron each garment on recommended setting as per the care label.
- Do not iron directly onto a printed logo. Always iron on the reverse.
- When ironing dark garments avoid 'iron shine' by either pressing on the inside of the fabric or through a damp cloth. This is not applicable if using a steam iron.
- Do not iron over buttons, try to press around them. If you do break one, an extra is included on the care label.

#### STAIN REMOVAL

Most stains can be removed by soaking in cold water as long as the fabric is washable, but as with all stains, prompt attention is important. Do not use hot water to rinse the stain as it may cause it to set. Place the stain to be removed over an absorbent cloth or wad of kitchen paper. In order to avoid a ring, first target the area around the stain and then work towards the centre, preventing it from spreading into the fabric.

Always test the removal method on a hidden part of the garment first to ensure that it does not harm the fabric.

**Ball point pen:** Apply methylated spirit or glycerine sparingly and mop up any loose colour. Rub any remaining stain with detergent and wash as per the care label.

**Blood, gravy, ice-cream, egg, chocolate:** Soak the stain in cold water and salt or in warm soapy water and then wash immediately as per the care

**Coffee & tea:** Soak up liquid with an absorbent cloth and sponge with warm water. Rinse with cold water and wash as per the care label.

Fat, grease & oils: Remove as much of the deposit as possible and work in neat washing up liquid with fingers. Treat with warm water and then wash immediately as per the care label.

**Make-up:** Do not rub the stain. Pat with talcum powder to soak up any grease and then work in neat washing up liquid with fingers before washing.

**Perspiration:** Sponge with weak solution of water and vinegar then rinse. Launder as per the care label.

**Beer & spirits:** Rinse or soak the stain in luke warm water and then launder in heavy duty detergent as per the care label.

White wine: Rinse the stain in warm water then soak in a warm detergent solution.

**Red wine:** First soak the stained area immediately in white wine or soda water to remove the colour, then launder as per the care label.

#### COMMON WASH PROBLEMS

**Shrinkage:** The major factors contributing to shrinkage are heat and excessive agitation. Do not wash at too high a temperature. Always wash on the most appropriate cycle and follow the care instructions.

**Pilling & bobbling:** Abrasion and lack of regular washing cause fibre balls to appear on the surface of the fabric. Remove by carefully brushing or picking off.

**Fading in sunlight:** Sunlight can be very harmful to fabrics and the effects are irreversible. Reduce exposure to direct sunlight wherever possible. Colour staining: Always wash similar colours together. Never leave damp garments together for any length of time.

#### PRODUCT SPECIFICATION SHEETS

Due to the variety of different fits across the Kustom Kit range, we encourage our customers to examine individual product specification sheets in order to establish precise measurements for each garment.

These sheets are available to download from the respective product pages at **www.kustomkit.com** and provide a comprehensive overview of measurements including actual chest, length and sleeve length along with a product description, ethical accreditation and care instructions.

210 21

#### **HOW WE MEASURE UP**

#### PROVIDING UNIFORMALITY WHILE CATERING FOR THE INDIVIDUAL

We understand that everybody is different so our shirts are available in a huge range of sizes and fits to ensure the whole workforce looks and feels great! This guide will help you find your perfect Kustom Kit shirt and understand how each of our shirts will fit you personally.

#### WHAT'S MY SIZE

To decide on the best fit for you, it's important to know your measurements. Firstly measure your chest around the fullest part and refer to our measuring guide on page 211. Next measure your collar, around the base of your neck whilst keeping your index finger between the tape and your neck, again refer to the measuring guide. The measuring guide is in actual body measurements not garment measurements, so if your chest measures 43"/112cms and your collar measures 17"/43cms we recommend that you take a 17" collar Kustom Kit shirt.

#### WHAT IF I AM IN-BETWEEN SIZES?

This will depend on how you like to wear your shirts. Classic shirts are cut more generously so will be more forgiving if you size down. Slim fit shirts however are neatly cut so we would recommend sizing up if you are between sizes.

#### MY COLLAR SIZE IS DIFFERENT TO MY CHEST SIZE

If you intend to wear a tie we recommend buying to your collar size measurement to ensure a neat and comfortable fit. Choose a classic fit if you use your collar size and a slim fit if you use your chest size. If you intend to wear the top button open then you should fit your shirt to your chest rather than your collar measurement

#### STILL UNSURE?

Kustom Kit can provide size charts for all garments upon request and our Customer Services team will be happy to answer any queries that you may have.

#### WHAT'S MY FIT?

#### Kustom Kit offers 3 different shirt fits

A traditional silhouette featuring straight side seams and a more generous fit across the chest, waist and sleeves. Cut with a long shirt tail that stays tucked in and wide armholes for ease of movement. Our classic shirts will have either side pleats or a central pleat to the back yoke for a non restrictive and comfortable fit. As a guide based on a 17" collar shirt the actual chest measurement will be 16cms larger than your actual chest and 32cms larger than your actual waist. Sounds a lot? Not really when you consider these measurements in a 3 dimensional context, refer to the illustration below.

Our tailored fit shirts are just that! Tailored through the body and sleeve for a closer fit that is both smart and contemporary. We taper the waist to ensure a clean silhouette while retaining an unrestricting garment shape. As a guide based on a 17" collar shirt the garment chest measurement will be 12cms larger than your actual chest and 22cms larger than your actual waist

Our closest fitting shirt is tailored through the body and sleeve. For a sleek appearance we taper the waist and add darts to the back. We keep the cut narrow at the shoulder and lift the armhole to enhance the modern slim silhouette. The result is a surprisingly flattering wearable garment that suits all. As a guide based on a 17" collar shirt the garment chest measurement will be 12cms larger than your actual chest and 14cms larger than your actual waist.

#### **TECHNICAL DEFINITIONS**

#### ADJUSTABLE CUFFS

Dual buttoning on cuff giving optional fastening for extra comfort.

#### **ANTI-PILL**

The surface of the fabric is treated to reduce the possibility of pilling.

#### COMBED COTTON

Yarn is combed at the spinning stage in order to draw out dead fibres.

#### COOLTEX

Technical fabric finish to wick moisture away from the skin, keeping the wearer cool and comfortable.

#### **EASY IRON**

A special finish to the surface of the fabric which reduces creases and minimises ironing.

#### FLAT KNIT COLLAR

Individually knitted to size, will not fray or curl.

#### **FUSED COLLAR**

An interlining is fused into the collar to help retain its shape.

#### GAUGE

How knitwear garment weights are measured. The higher the gauge, the finer the garment.

#### GSM

Stands for grams per square metre, referring to fabric weight.

#### HALF MOON YOKE

Styling detail sewn on to the back neck of the garment.

#### PRINCESS SEAMS

Long rounded seams used in women's tailoring for an enhanced fit.

#### REINFORCED SHOULDER

Tape inserted into the seam giving extra strength.

#### SELF FABRIC BOUND NECK

The fabric is passed through a folder to neaten the neck edge ensuring improved neck shape and comfort.

#### SIDE VENTS

Small opening at the base of side seam for a comfortable sporty look.

#### SLANTED PLACKET

Corner of placket is slightly tapered to prevent curling around the collar.

#### SUPERWASH 60°

A hi-tech fabric that allows the garment to be washed up to 60° for the removal of stubborn stains without affecting shape or colour.

#### TAPED BACK NECK

Self fabric tape attached to the neck giving a smooth and comfortable finish.

#### TAPED SIDE VENTS

Side vents are sealed with woven tape for extra strength.

#### TWIN NEEDLE STITCHING

Two rows of stitching at key seams for strength, style and neatness.

#### WARMTEX

Technical fabric finish to regulate body temperature - to keep the wearer warm when it's cold and cool when it's warm

#### **FABRICS EXPLAINED**

#### ACRYLIC

- · Excellent insulation and warmth
- Moisture wicking
- $\cdot \ \text{Lightweight}$

#### LYCRA, ELASTANE AND SPANDEX

- · Ability to stretch and return to original state
- · Moisture wicking
- · Bacteria resistant nature

#### MERCERISED COTTON

- · Stronger than regular cotton
- · Lustrous appearance which is easier to dye and hold colour
- $\cdot \, \text{Clean and smooth surface} \,$

#### NYLON

- $\cdot \ \mathsf{Extremely} \ \mathsf{durable}$
- · Lightweight for added comfort
- · Does not wrinkle

#### POLYESTER

- · Suited to sublimation
- · Strong and durable
- · Does not shrink
- · Inherent wicking properties

#### **IFRSFY**

Jersey or single jersey as it is sometimes known is the most basic of knitted structures. Highly versatile with good natural stretch, this knit construction can be used to produce fine fabrics for T shirts through to heavier fabrics for sweaters.

#### 1x1RIB

Rib is a variation of Jersey knit fabric. Stitches are knitted to the front and back of the fabric alternatively which produces ridges or lines. This construction has high stretchability making it perfect for cuffs and neck trims.

#### INTERLOCK

Interlock or double knitted jersey is a variation of jersey and rib. Stitches are knitted on the front and the back of the fabric to produce a heavier structure. The resulting fabric has less stretch but more stability and its compact structure makes an excellent print base.

#### **FLEECE**

Fleece is produced by brushing polyester/poly blended knitted fabrics. This creates the deep, fluffy fabric with insulating properties. For outdoor fleeces, two sided fleece is used while one sided fleece is used for the inside of sweats and boodies

#### OXFORD

Cotton or cotton blend yarns are woven in a basket weave construction to produce a hardwearing, textured surface.

#### PIQUÉ

Piqué refers to a knitted fabric generally used for polo shirts. It has a double knit construction knitted off circular machines which is characterised by its waffle/honeycomb texture. Thanks to the construction method it is durable and naturally wicking.

#### **POPLIN**

Poplin fabric is produced using a simple over/ under weave. The yarns are typically very fine to produce a tight weave that has a smooth texture.

#### TWILL

Twill is a type of a weave that can be identified by its diagonal, parallel ridges. It is both refined and hardwearing.

 $^{12}$ 

#### **ETHICAL STATEMENT**

Kustom Kit believes that business should be conducted with total respect for people and the environment. We adopt a rigorous selection process for garment manufacturers, ensuring only those that are totally committed to exceeding our high ethical standards become appointed suppliers. We have never purchased from a supplier that we haven't inspected and approved personally.

We do not own our factories and choose instead to build strong working relationships with carefully selected suppliers. We employ local agents and staff based in each of our garment factories whose sole focus is to ensure total compliance of our strict ethical standards for suppliers and to test fabric and finished garments at source.

#### SUPPLY CHAIN CODE OF CONDUCT COMPLIANCE

Our products are manufactured by different supplier organisations employing thousands of people in several countries. We recognise and honour our duty to protect the workforce employed to manufacture our garments and work tirelessly with our suppliers to ensure the provision of fair wages and working hours, safe and hygienic working conditions, regular employment and no discrimination, harsh or inhumane treatment of employees.

In order to manufacture Kustom Kit garments, each appointed supplier must comply with national and other applicable laws and conform to the following terms as a minimum requirement:

- Children must not be employed below the legal minimum age required by the law of the individual country.
- Employees are to be paid above the legal minimum wage as required by the law of the individual country.
- Working hours must not exceed those set out by local legislation. Overtime must always be voluntary and remunerated at a premium rate.
- Maternity leave must be made available to all female employees.
- Employment is freely chosen and no discrimination is practiced. There is no use of forced or involuntary labour and employees are free to leave their employment after reasonable notice.
- Good working conditions must prevail. The provision of adequate wash room facilities and a canteen are essential.
- Primary medical care must be provided on site.
- Correct procedure and policies should be in place to ensure employee health and safety.
- Workers' representatives are not discriminated against and are allowed access to the workplace to carry out their representative functions.
- Ensure that their own supply chain shares our ethics and is compliant to Kustom Kit's code of conduct.
- We do not accept outsourcing or the use of homeworkers. Failure to adhere to this condition will result in breach of contract.
- Agree to an independent audit as specified by Kustom Kit.

#### **FACTORY AUDITING**

An ethical audit is a formal examination of the labour practices of a workplace or company. It is a verifiable process to understand, measure, report on and help improve an organisation's social and environmental performance.

As a further safeguard our garment manufacturers must agree to permit regular unannounced visits from our senior management team.

We demand that all of our garment manufacturers hold a valid audit from at least one of the following:

WRAP Vorldwide Responsible

**BSCI**Business Social Compliance Initiative

SMETA
Sedex Members
Ethical Trade Aud

#### MODERN SLAVERY STATEMENT

Modern slavery encompasses slavery, servitude, human trafficking and forced labour. We are committed to acting ethically and with integrity and transparency in all business dealings and to putting effective systems and controls in place to safeguard against any form of modern slavery taking place within the business or our supply chain.

#### Our suppliers

Kustom Kit operates a supplier policy and maintains a preferred supplier list. We conduct due diligence on all suppliers before allowing them to become a preferred supplier. This due diligence includes an online search to ensure that the particular organisation has never been convicted of offences relating to modern slavery and on-site audits that include a review of working conditions. Our anti-slavery policy forms part of our working agreement with all suppliers and they are required to confirm that no part of their business operations contradicts this policy.

In addition to the above, as part of our contract with suppliers, we require that they confirm to us that:

- They adhere to our ethical policy.
- They hold at least one of the following factory audits; WRAP, SEDEX or BSCI.
- The factory makes audit reports available to Kustom Kit.
- They have taken steps to eradicate modern slavery within their business.
- They hold their own suppliers to account over modern slavery.
- They pay their employees any prevailing minimum wage applicable within their country of operations.
- They will allow UK employees to audit the factories when requested.
- We may terminate the contract at any time should any instance of modern slavery come to light.

#### **OUR ENVIRONMENTAL POLICY**

We recognise that our business activities affect the natural environment in a number of ways. We strive through continuing improvement to minimise the adverse effects on the environment and the earth's natural resources, whilst safeguarding the health & safety of our employees and the public. We purposely seek out suppliers who take positive action to minimise both waste and the impact of their manufacturing processes on the surrounding environment.

#### We aim to always:

- Comply with or exceed relevant legislative requirements. Where these are inadequate we will set our own standards that comply with our environmental and ethical criteria.
- Progressively reduce the environmental impact caused by our products and activities.
- Design and manufacture our products with consideration for the environment.
- Encourage manufacturing suppliers to recognise their environmental responsibilities and offer support to help them implement sound environmental health and safety policies and practices and to insist that the same practices are implemented within their own supply chain.
- Ensure that no chemicals deemed harmful to humans or the environment are present in our products.
- Insist that every component in all products hold a valid Oeko-Tex Standard 100 certificate to guarantee chemically safe garments.

#### European Regulation (EC 2006/1907-REACH regulation)

REACH is a European Regulation concerning chemicals and their safe usage. It aims to improve the protection of human health and the environment through a system of Registration, Evaluation, Authorisation and restriction of Chemicals. Chemicals deemed as harmful are added to the 'substance of very high concern list'. Kustom Kit products do not contain any of the chemicals on this list in any quantity and we actively work with REACH Ready to ensure compliance. The restricted substance list is usually updated twice a year. Kustom Kit routinely checks all products against any new listing to ensure we maintain this standard.

#### Oeko-Tex Standard 100

Oeko-Tex is an independent globally standardised certification especially developed for textiles. Its primary purpose is to ensure that the chemicals used in the manufacture of textile products are in no way damaging to health.

At Kustom Kit we understand what the modern wearer demands from their clothing. We expect colours to be brighter, we want our shirts to need little or no ironing and we require our sportswear to be fully functional keeping us both warm and dry. We test every component from fabric to thread, every label, lining, button and zip so that our customers never have to compromise on comfort or performance. Oeko-Tex Standard 100 allows Kustom Kit to deliver innovative fabrics and designs with complete confidence that no harmful chemicals have been used in their manufacture. Kustom Kit demands all products achieve this certification.

#### Oeko-Tex STeP - Promoting Sustainable Textile production

STeP is an additional factory audit which places emphasis on environmental performance and social responsibility. It is only gained by factories who achieve the highest level of sustainable production and safety ethics. The fabric used to manufacture the majority of our shirts is produced in a STeP accredited factory. We are working with our entire manufacturing base to encourage them to take part in the STeP auditing scheme.

#### **SUMMARY**

#### Kustom Kit confirms the following;

- All factories that manufacture Kustom Kit garments hold at least one of the following ethical audits WRAP, BSCI or SMETA.
- That none of our products contain any of the current substances of very high concern in accordance to European Regulation (EC) 2006/1907 – Reach Regulation.
- All components used in our garments have been tested to Oeko-Tex Standard 100 and hold a current certificate testifying this fact.
- Our management team regularly audit all of our garment manufacturing facilities and key suppliers to these factories.

A full copy of our ethical statement is available on our website or by contacting Customer Services.
