ELEVATING TEAMS

For organizations who choose distinction - Stormtech is a resourceful partner. Faithfully designing and supplying enviable products, we help teams rise above.

OUTFITTING COMPANIES SINCE 1977

At Stormtech, we believe in the value of a strong corporate culture. The world's most successful organizations focus on culture and employee engagement as key pillars for growth. We clearly understand that one can enhance the experience of employees and their connection to culture through offering well-designed apparel and gear. It is a formula that has been proven time and time again.

Stormtech has been meticulously designing and supplying quality outdoor apparel and accessories to companies throughout the globe for over forty years. No one does it better than we do and there is no better partner to deliver on your corporate outdoor apparel needs.

We are excited to introduce our 2018 Collection in a new workbook format. This workbook has been designed to be an effective, easy-to-use sales tool to guide you and your customers through our entire 2018 Collection. With a vast selection of apparel, bags and accessories across many product categories, we can outfit you, your team, or your company and help you rise above.

Thanks for your continued support.

STORMTECH

WEATHER & CLIMATE GUIDE

WATER RESISTANCE/BREATHABILITY

Our waterproof/breathable fabric coating and laminating process prevents moisture from the elements from entering the jacket while allowing perspiration vapour to exit. The higher the waterproof rating, the longer you stay dry. The higher the breathability rating, the more efficiently perspiration can escape.

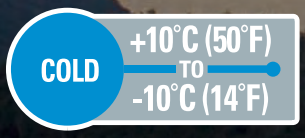

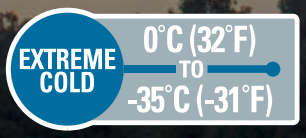

CLIMATE RATINGS

Our apparel is field-tested for performance in a wide range of climates and weather conditions. In order to help select the appropriate garment for your next adventure we have developed the following climate range system. Several factors should also be taken into consideration when selecting a garment by climate rating, such as activity level, wind chill, sun exposure, among others.

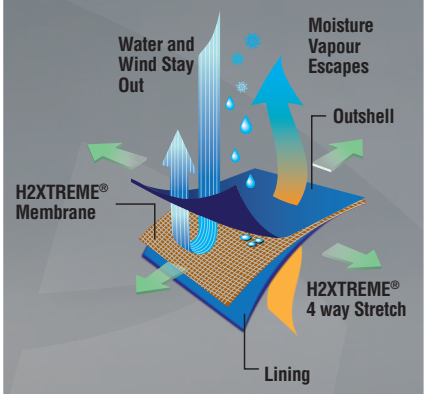

Please reference these symbols on all outerwear garments throughout this workbook.

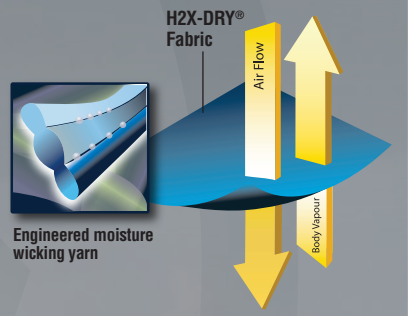

STORMTECH FABRIC TECHNOLOGY

WATERPROOF PROTECTION

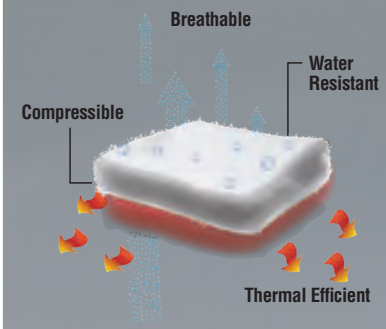

The ultimate in waterproof/ breathable technology developed by Stormtech, all H2XTREME® products deliver a minimum waterproof and breathable rating of 5,000mm/5,000g/m²/24h.

MOISTURE MANAGEMENT

H2X-DRY® moisture management fabric is a non-chemically treated knit that provides optimal moisture wicking capabilities to provide a more comfortable wear.

THERMAL PROTECTION

High efficiency/high loft synthetic alternative to down, designed to maintain its thermal properties while being lightweight and compressible, providing superior resistance in extreme cold conditions.

Fabrics treated with D/W/R repellency fight off dry soil and spills, and provide highly effective and long-lasting water-repellent protection.

Fabrics are engineered with built-in sun protection that will not wear off. Fabric is engineered to resist snagging.

Stormtech HD Out Shell is a heavy-duty, highly-durable, taslon polyester fabric constructed to withstand the most rigorous and extreme applications and industries.

DECORATION

Stormtech has a team of decoration specialists to execute your apparel branding using leading edge decoration techniques. Capabilities include:

EMBROIDERY

High density decorative stitching on fabric that evolved from handwork to today's high-speed, computerized multi-head machines. With state of the art embroidery equipment, thread and digitizing software, embroider artwork can be applied on a wide range of apparel products.

SCREEN PRINTING

A printing technique that uses a woven mesh to support an ink-blocking stencil. Nylon inks are used for fabrics with a high nylon content or stretch factor (such as polyester and lycra). Plasticol inks are used on all cotton rich products. It's the ideal decoration for a variety of fabrics and large format applications, at a low cost.

HEAT TRANSFER

The process of transferring images to a large variety of products without inks or screens is possible with heat transfer application technology. Perfect for waterproof fabrics. Heat transfer applications can provide extreme detail and is designed for logos with many colors.

SEAMLESS HEAT TRANSFER ht

Seamless Heat Transfer is a brand new, innovative way of branding a wide range of products with crisp, vibrant, full-colour graphics in a heat transfer application. This state of the art technology provides the ability to print and apply highly detailed logos and graphics while being very cost effective.

LASER ETCHING Le

This next generation tone-on-tone decoration technique uses a high energy beam of light to etch into fabrics while moving across a pre-determined course. This technique is ideal for etching extremely precise and intricate details into synthetic fabrics such as fleece.

DEBOSSING db

A die is created from a logo image and is then depressed into leather, suede or other fabric types with high heat and pressure. Thus allowing the image to sit below the product surface.

CORPORATE SOCIAL RESPONSIBILITY

Stormtech's Corporate Social Responsibility has 4 main pillars that we strive to meet and exceed company and industry standards and expectations, with improvements and advancements being continually assessed.

1. RESPONSIBLE SOURCING PRACTICES

Stormtech is firmly committed to selling products that are manufactured under legal, safe and fair working conditions in factories where employees are treated fairly.

Our Ethical Sourcing Policy is designed to ensure that our global sourcing supply chain operates in compliance to Stormtech' s requirements and all applicable laws governing issues such as child labor, forced labor, wages, benefits, working hours, harassment, health and safety and factory security.

2. PRODUCT SAFETY

Stormtech promises to provide safe, quality products that meet customer's health and safety expectations.

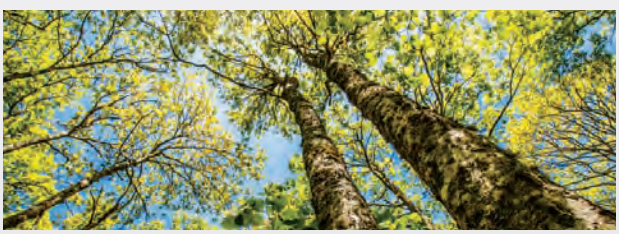

All Stormtech products imported into Canada, USA, Europe, and third party shipments follow strict adherence to product safety laws and regulations of the jurisdictions in which they are sold.

3. PRODUCT QUALITY ASSURANCE

At Stormtech, we take pride in ensuring our products are tested and inspected at the highest level of performance.

Our products are tested through third party accredited testing laboratories according to the American Association of Textile Chemists and Colorists (AATCC), American Society for Testing and Materials (ASTM), and the American Apparel & Footwear Association (AAFA).

4. ENVIRONMENTAL STEWARDSHIP

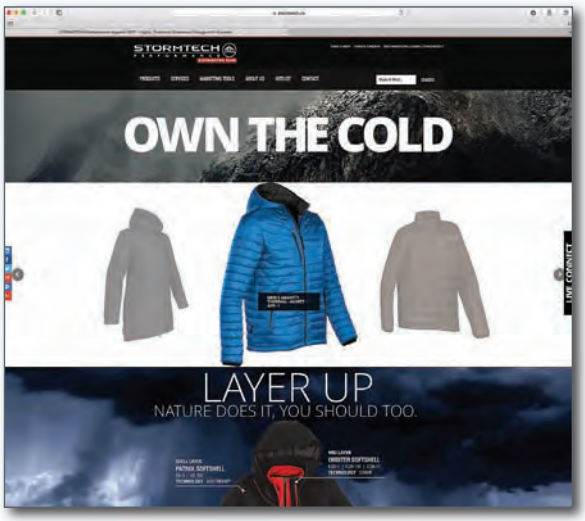

Stormtech is committed to reducing the environmental impact of our operations and therefore we encourage our business partners to comply with all applicable environmental laws and regulations in the country of operation.

ONLINE RESOURCES

DISTRIBUTOR SITE

Stormtech's distributor website includes re-designed search and navigation functions. The responsive navigation system includes a dynamic color search which allows visitors to navigate faster than ever before, empowering customers to match sales criteria in seconds. The design adapts for tablets and phones, providing a refined user interface across devices. Sizing charts, live chat, media download center, decoration guide, and online ordering are just a few great reasons to place your next order online.

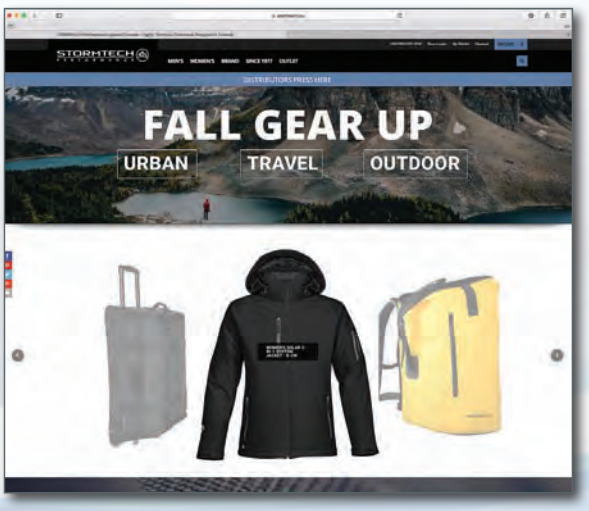

DISTRIBUTOR SITE FEATURES:

- Share Links
- Performance Indicators
- Live Inventory & Ordering
- Embroidery Calculator
- Sizing Charts
- Search by Color Results

RETAIL SITE

The Stormtech Retail Site delivers a strong presentation of the Stormtech brand story and product. With a responsive design, users can easily navigate products and place a direct order in a mobile-friendly experience. In combination with a wide digital marketing strategy, the Stormtech Retail site further builds our brand awareness in the retail and corporate landscapes.

MOBILE APP

The official Stormtech App is our most comprehensive library of global marketing materials for your mobile device. The App allows users to interactively view our latest catalogs in a simple magazine style interface. Once downloaded, content becomes available offline for future reference. New catalogs, products, and updates are synced directly to the App through push notifications.
